

Chapter 6 – Plan Implementation

This section shows how the goals and policies in Chapter 2 are implemented through procedures and criteria that the MRMPO uses to identify projects. The two sections in this chapter address: how and why projects are listed in the RTP, and criteria and considerations used by the MRMPO to fund projects.

A. Projects in the RTP

Requirements for metropolitan plans are described in Federal Highway Administration rules, 23 CFR Part 450.322. The plan must show through a horizon of at least 20 years the capital investment, operations and management strategies planned to lead to an integrated multimodal transportation system. Funding for all projects shown in the plan must be identified, or there must be a reasonable expectation for funding; meaning that the RTP Project List must be financially constrained.

The MRMPO developed the funding expectations for this plan in consultation with ODOT and the member jurisdictions. The estimates are the best available at the time, but are likely to change – especially in the long-range years (2031-2040). Details about the financial planning process and funding sources are shown in Chapter 8 *Financial Plan*.

It is important to note that not all transportation projects planned within the region are contained in this plan. Numerous local improvements are planned and implemented solely by the jurisdiction. Such projects are undertaken through the local Transportation System Plan (TSP), a state planning document required under Oregon land use law and generally incorporated into the local Comprehensive Plan.

Federal transportation planning regulations specify the types of projects to be included in the Regional Transportation Plan (RTP). These projects are:

- **Any regionally-significant project, regardless of funding source;**
- **Any project that will require federal environmental clearance;**
- **Any project that will be programmed in the MTIP; and**
- **Any project that will receive state or federal transportation funds.**

The Clean Air Act further defines the projects that must be included in MPO plans and included in analysis for the transportation conformity process. Because areas of the MRMPO have been designated by the Environmental Protection Agency as “attainment and maintenance areas” for carbon monoxide and particulates, Clean Air Act requirements must be met in this plan (see details in Chapter 9 *Air Quality* and in the *Air Quality Conformity Determination*, published separately).

1. Local Jurisdiction Transportation System Plans

Transportation planning begins in the local jurisdictions through the state-required Transportation System Plans. These plans identify local goals, existing and future system

deficiencies and needs, and describe the projects that will be undertaken to address those needs, generally over a 20-year period. Public input is a key component of the TSP process. Plans reflect the kind of transportation system the public believes the region should have. Because of the significance of the TSPs in the MRMPO, the MRMPO has followed a policy of drawing projects for the RTP Project List from the local TSPs.

The MRMPO planning process considers TSPs from a regional level, focusing primarily on improvements to roads – including construction of bicycle lanes, sidewalks and landscaping – and transit that serve the regional travel need.

B. Project Selection Criteria

There are two project funding sources over which the MRMPO has discretion. Both are federal programs funded through the Highway Trust Fund. They are the Surface Transportation Program (STP), a flexible funding source where funds can be spent on a variety of transportation related projects; and the Congestion Mitigation and Air Quality (CMAQ) program, to deal with transportation related air pollution. Details of these two funding programs can be found in Chapter 8 *Financial Plan*, and in Chapter 9 *Air Quality*.

The MRMPO has developed criteria for evaluating and scoring applications for STP and CMAQ funds in a way that treats all applications and jurisdictions fairly and provides the greatest possible public benefit. This chapter describes the evaluation criteria for both programs.

Goals and requirements are grouped into four broad performance categories:

- **Mobility**
- **Community Vitality and Livability**
- **Transportation Options**
- **Resource Conservation**

A total of 22 project evaluation criteria have been developed, each with guidelines on how it would be applied in project evaluation.

Table 6.1 – Policy Foundation for MRMPO Project Selection (established prior to RTP adoption)

MRMPO Recommended Goals and Objectives		
1: <i>Mobility</i>		Plan for, develop and maintain a balanced multi-modal transportation system to address existing and future needs.
		Optimize safety and security of the transportation system.
2: <i>Community Vitality & Livability</i>	Continue to work toward more fully integrating transportation and land use planning.	Use transportation investments to foster compact, livable communities. Develop a plan that builds on the character of the community, is sensitive to the environment and enhances quality of life.
		Use transportation investments to foster economic opportunities.
3: <i>Transportation Options</i>	Increase integration and availability of transportation options.	Use incentives and other strategies to reduce reliance on single-occupant vehicles.
4: <i>Resource Conservation</i>	Incorporate environmental and energy conservation into the RVMPO planning process.	Maximize efficient use of transportation infrastructure for all users and modes.
		Encourage use of cost-effective emerging technologies to achieve regional transportation goals.

1. Evaluation and Review

Evaluation procedures were developed by the MRMPO technical advisory committee and staff, and adopted by the Policy Committee. Projects are initially evaluated by staff, and those results as well as applicant information and evaluation materials are posted on the MRMPO website and advertised for public comment. The TAC reviews all materials (applications and staff evaluations) and makes any agreed upon adjustments. The TAC then will make their final funding recommendation to the Policy Committee, with the Policy Committee making all final project funding decisions.

C. RTP Project List

This section of Chapter 6 shows all RTP projects by jurisdiction. These projects provide facilities for motorists, buses, bicyclists and pedestrians. They serve long-range needs for mobility and accessibility based on anticipated development.

Projects listed (referred to as Tier 1 projects) do not represent all of the transportation actions anticipated. Each jurisdiction will plan and carry out a multitude of local projects, which don't meet the criteria to be part of the MRMPO process. The local activities are based on the local Transportation System Plans (TSPs), which cities and the counties develop as part of their state comprehensive planning obligations. The MRMPO projects are first identified in the local TSPs.

This plan identifies nearly \$95 million expected to be available to invest in the regional transportation system through 2040. Details about the financial assumptions used to calculate these sums and financially constrain the projects in this chapter are provided in Chapter 8 *Financial Plan*.

1. Project Timing

The project lists on the following pages provides a brief description of the work to be done, estimated cost based on year of construction or implementation (inflation adjusted) and the timing.

Projects are scheduled by the following timeframes:

- **Short Range – Between 2015 and 2020**
- **Medium Range – Between 2021 and 2030**
- **Long Range – Between 2030 and 2040.**

The project number, or “RTP number”, shown in the left hand column are internal tracking numbers for project identification within the MRMPO. As projects are implemented they are added to the MRMPO programming document, the Metropolitan Transportation Improvement Program (MTIP) and forwarded into ODOT’s Statewide Transportation Improvement Program (STIP) for authorization to proceed. At the MTIP-STIP stage, projects receive a programming Key Number, which differs from RTP numbers. The key number is useful for tracking projects through implementation.

Map 6.1 shows project locations by RTP number and is located at the end of this chapter, immediately following the project list tables.

2. Other Projects

Additional projects identified as necessary and important by all jurisdictions (called Tier 2 projects) are presented in Table 6.5 at the end of this chapter. No funding has been identified for the Tier 2 projects. They have not gone through the regional Air Quality Conformity process required for the official RTP projects.

Table 6.2 – RTP Project List by Jurisdiction, Short Range Projects (2015 – 2020)

PROJECT NUMBER	LOCATION	DESCRIPTION	TIMING	COST	Short Range Funding Sources (2015 - 2020)						Cost by Phase	Conformity Status	Comments
					CMAQ	STP	Enhance-It	Local	Transit Funds	State ODOT
