KEY NUMBER 4

**Project justification:**

Lincoln Road is a critical north-south aligned road on the western side of the city of Grants Pass. Lincoln lies near the current Urban Growth boundary and serves an incredibly wide range of public and private interests. Lincoln has long been targeted as a critical connection to complete a 'loop' for western Grants Pass -the downtown core > G Street > Lincoln > Bridge Street. These streets all see daily traffic counts regularly above 5,000 vehicles.

Lincoln provides direct access to Grants Pass' most heavily utilized park - Reinhart Volunteer Park (All-Sports Park). Facilities located on Reinhart's 50+ acres include - softball and soccer fields, tennis courts, fishing ponds, hiking trails and a large playground area. Reinhart regularly hosts softball/soccer leagues and tournaments, Babe Ruth and Legion baseball games, community walk/run/bike events and fishing derbys. Reinhart also provides community access to a quarter mile of Rogue River frontage and the Grants Pass pedestrian bridge to Tussing Park.

Lincoln Road is one of two primary roads utilized to access Parkside Elementary School. Lincoln also serves as the access to Lower River Road and a number of Rogue River attractions including numerous boat ramps, parks and farms. Lastly Lincoln sees significant traffic of all modes from two active adult community developments, Westlake Village and Rogue Lea Estates, immediately to the south.

Lincoln Road was an Oregon Department of Transportation (ODOT) facility until a recent jurisdictional exchange with Insenhine
